Rain Garden Workshop

Learn how to soak up rain water from downspouts, driveways and sidewalks.

**Puget Sound
Starts Here**

As the open space in the Puget Sound region has become more developed, problems with excessive storm water have also increased. You may have experienced this in your own yard and neighborhood, with seasonal flooding, erosion, or other problems. The good news is that you can add beautiful features to your garden that will be part of the solution! You will see for yourself as you tour the rain garden at Town Square Park.

This workshop highlights the benefits and methods of creating a rain garden, rock-lined swale, and other projects that you can do to incorporate storm water management into an existing garden. The presentation includes a display of plants that are tolerant of wet soils and other materials, plus handouts on how to create a RainWise garden.

WEDNESDAY

September 14

6 PM - 8 PM

Town Square Park

**31600 Pete Von
Reichbauer Way S**
